

Sessions & actions averages

Gives the average statistics of unique visitors (sessions) and their actions in a chosen time frame (year, month, week, etc.). For example a week will present a day average and a day will present an hour average.

Module options

The module contains the following two filter options,

Grouping filter

Enables or disables the grouping filter. The grouping filter, groups sessions that behave as single sessions but actually are single visitors. By enabling this filter you get a more realistic number of visitors.

Robot filter

Enables or disables the robot filter. The robot filter, filters out robots (for example search engines). By enabling this filter you get a more realistic number of visitors.

Graphs and tables

See 'Sessions and actions' documentation.
