

Debug logging data

Shows a table containing all data that is logged and used by the statistics engine per day. This module also enables a content manager to look at the actions per session (visitor).

Data table

Date - time	Row number.
Dom_id - Domain	The date and time the session started.
Host - address	The visited domain id and domain name of the session.
Agent	The host name and ip address of the session.
Type*	The user agent of the session.
	The type of the session.

Type table

0	Unauthenticated session.
3	Authenticated session.
4	Robot session.

Options

Group items	Enable or disable the grouping filter.
View undefined users	Shows undefined users.
View defined users	Shows defined users.
View robots	Shows robots.
Click on session row	Shows table of actions.

Actions table

Show a list of action performed by the selected session

Date / time	Number.
Type	Date time of the action performed.
Name	Type of action.
	Name of the item of the performed action.

Click on the action to go to the belonging item.
