

eCommerce components

Over the years Xsdot has developed a vast set of eCommerce components that are used in for example web shop (B2C) and business to business (B2B) solutions (See [Xsdot E-commerce solutions](#) for more information). All Xsdot eCommerce components can be freely combined and seamlessly integrate with other Xsdot services like Content management, CRM and eMailing services.

Select one of the eCommerce component categories below,

E-Commerce components

[Configuration & definition services \(6\)](#)

[Administration modules \(5\)](#)

[Product components \(8\)](#)

[Customer services \(8\)](#)

[Order modules \(10\)](#)
