

PDF server

The PDF server component handles all the PDF requests, it implements selectable (custom) design templates for the pages, books, products, catalogs, order invoices and offers. One application domain can contain one or more PDF server components.

A screenshot of a configuration window for a PDF server component. The window has a title bar with a red Adobe logo icon and a close button. The main area contains the following fields:

- title:** A text input field containing "Xsdot PDF Service".
- description:** A text area containing the text: "The PDF server component handles all the PDF requests, it implements selectable (custom) design templates for the pages, books, products, catalogs, order invoices and offers." The text is wrapped and has a scrollbar on the right.
- page/book template:** A dropdown menu with "Xsdot PDF Book" selected.
- invoice template:** A dropdown menu with "Xsdot PDF Invoice" selected.
