

## Variable group

A variable group component is the root element of a variable and attribute system. By defining variable groups, multiple variable and attribute systems can be created in a web application.

The customer or visitor can select the variable groups in the attribute drill down modules.

variable group:

description:

- [-] Attribute systems
  - [-]  Music variables
    - [+]  Category
    - [+]  Artist
    - ▶ [-]  Media
      -  CD
      -  DVD
      -  mp3 CD
      -  Download
  - [-]  Clothes variables
