

Variable group

A variable group component is the root element of a variable and attribute system. By defining variable groups, multiple variable and attribute systems can be created in a web application.

The customer or visitor can select the variable groups in the attribute drill down modules.

variable group:

description:

- [-] Attribute systems
 - [-]  Music variables
 - [+]  Category
 - [+]  Artist
 - ▶ [-]  Media
 -  CD
 -  DVD
 -  mp3 CD
 -  Download
 - [-]  Clothes variables
