

Item view

An item view component places a list of items (pages or products) in web page or web application depending on the selected attributes.

The item view component implements a design template system for defining unlimited design list definitions and navigations like lists, icons, tables, etc. This component also implements Ajax navigation systems.

<p>Delft Blue - Ashtray</p>  <p>Nice Delft blue ashtray.</p> <p>price: 16,50 euro</p> <p>buy </p>	<p>Delft Blue - Plate 1</p>  <p>Lovely hand-painted Delft blue plate.</p> <p>more options available</p> <p>buy </p>	<p>Delft Blue - Kissing couple</p>  <p>Very cute Delft blue kissing couple.</p> <p>price: 15,00 euro</p> <p>buy </p>
